PROFESSIONAL SUMMARY

Data Engineer with 5 years building enterprise data platforms. Expert in Apache Spark, dbt, and modern data stack. Experience scaling data warehouses to petabyte level.

SKILLS

Data Engineering: Apache Spark, Apache Flink, dbt, Airflow, Kafka

Warehouses: Snowflake, BigQuery, Redshift, Delta Lake

Languages: Python, SQL, Scala, Bash

Cloud: GCP (Dataflow, Dataproc, BigQuery), AWS (Glue, Athena, EMR)

Tools: Docker, Terraform, Git, Looker

EXPERIENCE

Senior Data Engineer -- Lyft, San Francisco, CA (May 2021 - Present)

- * Architected real-time streaming pipeline processing 200M events/day using Kafka + Flink
- * Built dbt transformation layer over Snowflake serving 150 analysts
- * Reduced Spark job runtime by 60% through partitioning and caching optimisations
- * Onboarded 12 data producers to internal event schema registry

Data Engineer -- Palantir Technologies, New York, NY (Jul 2019 - Apr 2021)

- * Built ETL pipelines for Fortune 500 clients ingesting 10TB/day
- * Designed data quality framework with 500+ automated checks
- * Migrated client from Hadoop to Spark -- 4x performance improvement

EDUCATION

M.S. Data Science -- Stanford University, 2019

B.S. Mathematics -- KAIST, 2017
