---

## PROFESSIONAL SUMMARY

Machine Learning Engineer with 5 years of industry experience designing and deploying production ML systems at scale. Deep expertise in NLP, transformer models, and MLOps. Proven track record of shipping models that directly impact business KPIs.

## SKILLS

ML/AI: PyTorch, TensorFlow, Hugging Face Transformers, scikit-learn, XGBoost

MLOps: MLflow, Kubeflow, SageMaker, Weights & Biases, DVC

Languages: Python (expert), SQL, Bash, Go (intermediate)

Data: Spark, Kafka, dbt, BigQuery, Airflow

Infra: Kubernetes, Docker, Terraform, GCP, AWS

## EXPERIENCE

Senior Machine Learning Engineer -- Amazon (AWS AI Labs), Seattle, WA (2021 - Present)

- \* Led development of large-scale document understanding model (BERT-based) reduced manual processing by 70%, saving \$2M/year in operational costs
- \* Fine-tuned LLaMA-2 for domain-specific Q&A; deployed via SageMaker endpoints (P99 latency < 120ms at 10k RPS)
- \* Built real-time feature pipeline using Kafka + Spark Streaming serving 50+ ML models
- \* Mentored 4 junior ML engineers; established team ML best-practices playbook

Machine Learning Engineer -- Microsoft (MSAI), Redmond, WA (2019 - 2021)

- \* Developed NLP pipeline for Azure Cognitive Services -- intent classification (F1: 0.94)
- \* Contributed to open-source spaCy extension library (500+ GitHub stars)
- \* Ran A/B experiments across recommendation system; +12% CTR improvement

## EDUCATION

M.S. Computer Science (ML specialisation) -- University of Washington, 2019

B.Tech Electronics & Communication -- IIT Bombay, 2017
