PROFESSIONAL SUMMARY

Application Security Engineer with 5 years specialising in secure SDLC, threat modelling, and penetration testing. OSCP-certified. Passionate about shifting security left and building developer-friendly security tooling.

SKILLS

AppSec: OWASP Top 10, threat modelling, SAST, DAST, SCA

Pen Testing: Burp Suite, Metasploit, Nmap, BloodHound, OSCP methodology

Languages: Python, Bash, Go (security tooling), SQL

Cloud Security: AWS Security Hub, GuardDuty, IAM least-privilege, GCP SCC

DevSecOps: Snyk, Semgrep, Trivy, GitHub Advanced Security, Dependabot

Compliance: SOC 2, ISO 27001, PCI DSS fundamentals

EXPERIENCE

Senior Application Security Engineer -- Palo Alto Networks (2021 - Present)

- * Led security review programme -- triaged 300+ SAST findings/quarter; 0 critical CVEs shipped
- * Built internal threat-modelling tool in Python adopted by 12 product teams
- * Designed and delivered annual AppSec training for 200+ engineers
- * Conducted red-team exercise uncovering 3 previously unknown attack paths

Application Security Engineer -- Intuit (2019 - 2021)

- * Performed 50+ penetration tests on web and mobile apps (OWASP methodology)
- * Integrated Snyk and Semgrep into GitHub Actions; reduced vulnerable dependencies by 80%
- * Authored secure coding guidelines adopted across 6 engineering teams

EDUCATION

B.S. Cybersecurity -- San Jose State University, 2019

CERTIFICATIONS

Offensive Security Certified Professional (OSCP)

AWS Certified Security - Specialty

Certified Ethical Hacker (CEH)
